## Learning outcomes and Graduate attributes

The affiliating institution specifies the learning outcomes for both the BDS and MDS programs, and the college implements the curriculum as needed to meet the objectives. Students and faculty are informed about the results through the college website and the orientation program. These key learning results are presented below.

### Learning Objectives

1. The incorporation of fundamental sciences, clinical dental surgery, laboratory and practical abilities
2. Adequate practical skills, including patient management abilities, patient care of all age group, with special attention to children, elderly, and patients who are immune compromised or disabled.
3. Social elements of health care, in particular oral health care, including the causes of societal differences in oral and dental demands.
4. Driven to engage in multidisciplinary research projects and emphasise the importance of evidence-based dentistry
5. Attending continuing dental education courses in dental surgery to gain knowledge on current strategies
6. Acquires knowledge in cross-infection prevention in dental practices
7. To understand the role of different dental tissues in forensic sciences.
8. Participates in community camps, general hospital postings, and dentistry hospitals

OFF. OMR NEAR - NAVALUR

THALAMBUR, CHENNAI-600 130.

9. Executes all types of local anesthesia, and gains knowledge about different maxillofacial issues such as injuries, infections, and jaw deformities.

10. Different types of restoration, endodontic procedures, and fixed and removable prosthodontics

11. Recognize the significance of malocclusion development and dentofacial growth.

12. Gain knowledge of various radiological techniques and how they are interpreted. The affiliating institution defines the Graduate Traits, and the college follows the university's procedures to evaluate students on these attributes. The key graduate characteristics are listed below.

### **Graduate Qualities:**

1. Graduating with technical and clinical skills is mandatory for general dental practice.
2. Provide patients, regardless of age, with comprehensive oral care.
3. To understand how oral and health care are impacted by social, behavioural, environmental, and economic issues.
4. Providing medical and dental care as a member of the healthcare team, especially to rural residents.
5. Self-centered learning for ongoing dental surgery improvement.
6. Learns about modern dental surgery technology
7. Aids in maintaining documents that might be important for forensic investigations and pursuing forensic science as a career.
8. A graduate who is capable of identifying and diagnosing dental and oral problems, undergoing dental treatment, and offering prevention advice.
9. Competencies for performing minor oral surgeries and tooth extractions in general dentistry set-up. Capable of doing such procedures with graded general practice skills
10. Patients receiving straightforward appliance therapy in the realm of orthodontics
11. Knowledge of radiation risks and appropriate safeguards for patients, operators, and employees

During the orientation session and on the college website, information regarding the Graduate Attributes is provided to both students and professors.
